Holiday : The system will exclude these dates from calculations when determining expected delivery dates and processing times for orders. It ensures that non-working days and holidays are taken into account, providing accurate information to your customers.

Days Off: you can configure days off to account for non-working days or days when your store does not process orders or perform other operations. By configuring days off, you ensure that the delivery date calculations and order processing times are accurately adjusted to exclude these non-working days.

Date format : Select date format, to be displayed on frontend.
