

## Instagram

### **Compatibility :-**

Name : InstagramFeed

Compatible With :

PHP : >=5.6

Magento Community: >2.1

### **Description :-**

Ever thought of giving different price quotes to different customers? You can achieve that thing by using the **Instagram** extension.

The Instagram Feed supports displaying your Instagram photos on the homepage, product page or on any CMS page within your sites. You can also configure the number of images per row and the maximum number of images displayed. You can also configure owl-carousel slider like slider item, slider loop, slider item nav, slider dots, slider autoplay.
